

HULIGESH D HOSAMANI PAVAR

AI/ML Engineer | CSE (AI & ML)

huligesdh10@gmail.com | +91 80883 44141 | India | [LinkedIn](#) | github.com/Huligesdh10

I am working to become an Artificial Intelligence and Machine Learning Engineer. This is because I am very curious about how intelligent systems learn and solve world problems. I like to break down problems into smaller ones. I also like to try out ideas and learn from my mistakes so I can do things better. My goal is to use what I learn to make Artificial Intelligence solutions. At the time I want to keep growing and getting better, as an Artificial Intelligence and Machine Learning Engineer.

EDUCATION

Parul University , <i>B.Tech, Computer Science Engineering (AI & ML)</i>	2025 – 2029 Vadodara, India
Taralabalu College , <i>Higher Secondary (12th) — 50%</i>	2025 Davangere, India
Siddaganga School , <i>Secondary School (10th) — 63%</i>	2023 Davangere, India

RESEARCH EXPERIENCE

Research Intern — Parul University	2026 – Present Vadodara, India
- Conducting research on deep learning approaches for EEG-based seizure detection, exploring convolutional neural network architectures for physiological signal classification. - Researching EEG signal preprocessing pipelines using Python and MNE-Python for noise reduction, filtering, and feature extraction. - Developing and experimenting with CNN model architectures in TensorFlow/Keras, iterating on training methodology and evaluation approach.	

TECHNICAL SKILLS

Programming: Python, C++, Java
AI / Machine Learning: Machine Learning, Deep Learning, Neural Networks
AI / ML Frameworks & Libraries: TensorFlow, Keras, MNE-Python
Frontend: React, Next.js, HTML, CSS, Tailwind CSS
Backend / Databases: FastAPI, PostgreSQL
Tools: Git, GitHub, Electron

PROJECTS

Arvitta Browser OS <i>React, Electron</i>	2026 – Present
- Building an AI-powered desktop browser that integrates productivity features directly into the browsing experience, going beyond a standard browser shell. - Implemented tab management, an embedded voice assistant, and website-blocking functionality using custom React components inside an Electron application. - Designed the front-end architecture to support multiple AI-driven browsing features within a single unified interface.	
Arvitta — AI Growth & Agentic Commerce Platform <i>Prisma, SQLite, Razorpay, Nvidia nim API</i>	2026 – Present
- Built independently a full-stack platform connecting customer ordering, kitchen, cashier, Razorpay payments, loyalty, and customer engagement. - Integrated Razorpay QR payments and connected transaction flows with customer-growth and engagement features. - Engineered real-time synchronization across customer, kitchen, and cashier interfaces for end-to-end order management. - Developed AI-powered growth features using NVIDIA NIM APIs for customer insights, personalized offers, and loyalty strategies.	
Nyayavadi <i>RAG, LLM, Python</i>	2026 – Present
- Developing an AI-powered legal assistant designed to simplify access to Indian legal information for everyday users. - Implementing Retrieval-Augmented Generation (RAG) and semantic search to retrieve relevant legal documents and generate context-grounded responses. - Building a conversational AI interface that handles natural-language legal queries and returns easy-to-understand explanations. - Focused on improving legal information accessibility while reducing unsupported, hallucinated AI-generated responses	
ArtinaAI <i>AI / ML Application</i>	2026 – Present
- Developing an AI-powered grievance management platform to streamline complaint registration, tracking, and resolution, built for Smart India Hackathon (SIH) 2026. - Implementing AI-based classification and prioritization to automatically organize and route incoming grievances. - Designing role-based dashboards for citizens, administrators, and authorities to monitor grievance status.	

CERTIFICATIONS

- Python Course** — Tutedude (Completed 8 July 2026) | Cert ID: TD-HULI-PY-0940
- AI Foundations Associate** — Oracle Cloud Infrastructure (OCI) — to confirm (Dec 2025 — to confirm)
- Prompt Engineering for Generative AI** — Parul university

LANGUAGES

English — Professional | **Hindi** — Conversational | **Kannada** — Native
